Pred. No. is the number of results predicted by chance to have a

score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.

```

This sequence represents cDNA encoding a rice Na+/H+ antiporter (countertransporter), OSNHX1. The invention relates to OSNHX1 and nucleic acids which encode it; vectors, host cells and transgenic plants containing OSNHX1 nucleic acids, recombinant expression of OSNHX1; and antibodies which recognise OSNHX1. OSNHX1 nucleic acids are useful in the production of salt tolerant transgenic plants.

```
The present sequence is a gene, which encodes a protein with vacuolar pH regulatory activities. The gene enables flower colour to be controlled via regulation of the vacuolar pH, colours can range from blue to red in colour spectrum. The gene is useful in controlling flower colour to give new breeds of colourful plants for cut flowers, particularly applicable
                                                                                                                        2040
